INTRODUCTION

The D.W. Haber Power Cell is a revolutionary solution for keeping food hot for extended periods of time.

The sleek and elegant design makes it a stylish addition to buffets & food stations, and its cordless battery operation allows it to be used anywhere.

The Power Cell has a 6-hour recharge time so it can be used for multiple meals per day, and it is a cost-saving solution as it compares to repetitive purchases of chafing fuel. The first of its kind, this induction unit is energy efficient and operates quietly, ensuring that it won't disturb the ambiance of the setting.

Experience the freedom of setting up your buffet station in any location, whether it's a wedding reception, corporate event, or outdoor celebration. No longer will you be limited by the availability of power outlets or the hassle of dealing with fuel cans. Not only does the Power Cell save you from the ongoing expenses of buying chafers or paying electricians, but it also has a significant positive impact on the environment. By eliminating the use and disposal of fuel cans, you're contributing to a greener future while enhancing your profitability.

Class 9 – UN3481

- Lithium ion batteries contained in equipment.
